1 Introduction

Delta Stack is a collaborative group of independent freelance professionals specializing in web and mobile application development. Formed through personal networks, our team offers:

- Expertise in software engineering, UI/UX design, and business analysis
- Flexible team structure to meet project-specific needs without a formal legal entity
- Customized project details (timelines, deliverables, pricing) through negotiation

This Statement of Work (SOW) outlines our core services, team capabilities, and engagement approach.

2 Scope of Services

Delta Stack delivers end-to-end web and mobile application development, focusing on:

- E-commerce platforms
- Service-oriented applications
- Custom business solutions

Our services include:

2.1 Discovery and Planning

- Gathering requirements and developing user stories
- Conducting market analysis and creating project roadmaps
- Implementing agile project management (Scrum or Kanban)

2.2 UI/UX Design

- Performing user research, wireframing, and prototyping
- Conducting usability and A/B testing
- Developing design systems using Figma or Adobe XD

2.3 Frontend Development

- Building responsive web interfaces with modern frameworks (React.js, Angular, Next.js)

2.4 Backend Development

- Creating scalable APIs and microservices using ASP.NET Core and Docker

2.5 Mobile Development

- Developing cross-platform apps for iOS and Android using React Native, Flutter, or Xamarin

2.6 Integration and Testing

- Integrating APIs and third-party services
- Conducting quality assurance, performance optimization, and deployment

2.7 Post-Launch Support

- Providing optional maintenance and updates based on project needs
- **Team Size:** Variable, typically 7 core members, with the ability to add or remove team members for critical roles as required by specific project demands
- **Communication:** Fully remote, with regular updates via Zoom, Slack, or email

3 Team Composition and Expertise

Our team comprises experienced freelancers with proven track records. As a newly formed collective, Delta Stack ensures seamless collaboration by leveraging combined expertise. The core team can be adjusted by adding or removing members for critical roles based on project requirements.

4 Deliverables and Approach

4.1 Deliverables

- Wireframes and prototypes
- Source code and technical documentation
- Deployed application
- Quality assurance reports

4.2 Project Phases

1. **Kickoff (12 weeks):** Scoping and initial planning
2. **Design & Development:** Iterative builds with client feedback
3. **Testing & Deployment (24 weeks):** Quality assurance and launch
4. **Handover:** Delivery of assets and optional post-launch support

4.3 Timeline

- Estimated 412 weeks for mid-sized projects, adjustable based on scope

4.4 Assumptions

- Client provides necessary access (e.g., APIs, data)
- Scope changes may impact timelines or costs
- Tools include Git for version control and Azure or similar cloud platforms

4.5 Risks and Mitigation

- **Freelancer Availability:** Ensured through contracts and clear communication
- **Collaboration Risks:** Mitigated via regular check-ins and project management tools

5 Terms and Next Steps

- **Payment Terms:** Milestone-based (e.g., 30% upfront, 40% mid-project, 30% on completion); specifics negotiable
- **Confidentiality and IP:** Adherence to NDA terms; intellectual property transfers to client upon final payment
- **Governing Law:** Subject to mutually agreed jurisdiction
